ICML
INSTITUTE FOR COMMUNICATION MANAGEMENT AND LEADERSHIP

PROJECT MANAGEMENT

Managing Risk

Identify, assess and manage risk to keep projects and initiatives on track.

WHO IT'S FOR

Project teams and managers who need to identify and manage risk.

DURATION

1 day, or tailored to your needs

FORMAT

On-site: we come to you, virtual or hybrid.

PARTICIPANTS WILL DEVELOP THE SKILLS TO

- Establish the context for managing risk
- Apply a risk management framework to a project
- Identify risks early, from every part of the project
- Design and complete a risk assessment
- Plan practical responses to the risks that matter
- Set up risk reporting, monitoring and review

ABOUT THIS PROGRAM

Most project problems were visible earlier, if someone had been looking. Our risk management training gives participants a structured way to see them: set the context, identify what could go wrong, assess likelihood and impact, and agree how to respond. Participants complete a risk assessment on a project or initiative from their own workplace, build a response plan and set up the reporting that keeps risk in front of decision-makers.

Tailored to your organisation

We build in your risk framework, rating scales, registers and terminology, or help you develop them, and use risks from your own projects, department or organisation.

"

I found the training very beneficial and understood a lot more of the information than I thought I would. I learnt something new, which is what I wanted.

Participant, Latrobe Community Health Service
